D. A. Wheeler : The DIY Coffee Experience: coffee, coffee cake and scone recipes that will save you money. before purchasing it in order to gage whether or not it would be worth my time, and all praised The DIY Coffee Experience: coffee, coffee cake and scone recipes that will save you money.:

I personally got tired of shelling out \$\$\$ for my coffee habit and I sure wasn't going to give it up. Let's face it we love coffee. It inspired me to produce DIY Coffee Experience and coffee inspired you to pick it and look at it. I am sure we both can agree that our love for coffee can get a bit expensive. If you have only one latte per day @ \$ 3.45 USD in a one year period you will have purchased \$1259.25 USD worth of lattes. That for some is a serious chunk of money. Along with the cash out flow there is also the issue of the cups that might end up in a land fill and the time that you spent in line waiting. This book isn't about saving the planet or time management, but I will say. Your mug will end up in the dishwasher not the land fill and you won't be standing in your kitchen behind someone having a show down with a barista because their coffee wasn't made to their liking. Well maybe this book it is about that in a small way. Anyway this book is about the perks of "DIY Coffee Experience", saving you money.

About the AuthorArtist, food fan, book worm who refuses to own a television. Life is about learning and growing and leaving things better than you found it.
