This book has changed my life forever.By Cindy M.So many times we try to heal ourselves through other means without ever taking a deep look at what we consume on a daily basis. I for one was so naive to believe that my diet could never be responsible for my sickness. I am 27 years old and in March, I will have been diagnosed with Lupus Nephritis for 13 years now. In December 2014, I hit the lowest point of my health when I had to undergo emergency dialysis and prepare for a kidney transplant, all while doing chemotherapy in the mean time. I was sick and tired of it all: all the drugs (10-15 pills a day), all the chemotherapy (four times a month), and all the doctor's visits and hospital stays. I had been following Kristina for a while on Instagram and had participated in one of her 21-day challenges and I knew that eating fresh, raw, unprocessed, fruits and vegetables are good for you but I was too scared and unwilling to

make the jump. With her cheery motivation and upbeat spirit, constantly giving me ideas on how to eat "Fully Raw" meals daily, I took the plunge. As of August 2015, I am vegetarian and I consume 1-2 fully raw meals a day. I told my doctor that I will not be doing chemotherapy anymore and I will not be taking my 13 year long daily drug cocktail. I told my doctor that I want to see if I can eat myself to better health and after almost 6 months of this lifestyle, I have never been healthier and my body is starting to heal itself (the proof is shown in monthly blood work and doctor's visits). Kristina's lifestyle is not a fad. Eating real fruits and vegetables is something that we should be doing but oh, how we forget to do something as simple as that. I stopped making excuses and started picking up the right things to eat. As a first generation Cambodian-American, my culture's cuisine is riddled with high-salt and fermented (rotten) food. I don't eat those foods anymore but that's alright. In fact, my family have started to adopt some of my eating habits as most of our family all take some form of high blood pressure medicine. Do what the book says. You don't have to go fully raw all day long but start out with one meal (my personal favorite Kristina is your "Love Smoothie" and "Fully Raw Pad Thai"). Instead of reaching out for a box of unhealthy snacks, grab an apple or make some guacamole with dip-able veggies. There are a million ways to eat Fully Raw. It's our job to take care of this body we were given. As a young woman whose life was taken over by a terrible disease at the age of 13, you will never see me go back to the way I once lived. Thank you Kristina. My self and my kidneys are grateful for having discovered and adopting you and your lifestyle. *Pictures show my weight fluctuation due to kidney failure, hospital stays, dialysis, and what I currently look like in a before and after photo. I've definitely come a long way with this diet. =>*629 of 698 people found the following review helpful. Beware of Incentivized Positive Reviews By Tao Jones While Kristina's recipes look beautiful and are great at inspiring ones to transition to a Live Foods Diet, promising a Vitamix blender to the person who leaves the best positive review is a very shady practice and makes it hard to gauge which reviews are sincere and which ones are just hyped up because of the incentive. #fullyrawbook*** EXCERPT FROM KRISTINA'S EMAIL SENT JANUARY 5, 2016 ***AND...as an added bonus for YOU, my friends, who have helped to support me throughout this process and who have supported me by purchasing the book, I am doing an incredible giveaway just for you!
