match the ingredients, and don't match the title either. The meat lover's supreme pizza only has one kind of meat listed. The author's name on the front cover doesn't match the name following the title page. 1 of 1 people found the following review helpful. Well... this might be good... By El Stupido the Magnificent Who wrote this? One author on outside cover, someone else on inside... if the dough recipe works... this may be worth buying... sauce recipe sounds reasonable. Several errors in wording. Otherwise... give this a try... sounds good and do I like pizza. You can always make it better at home!!! 0 of 0 people found the following review helpful. Not worth the money By Anika Gupta I got this to give as a gift. Although the recipes look interesting, \$20 is way too much for this. The paperback version just looks incredibly flimsy. It's thin, and the paperback binding looks really cheap. Some of the pictures are in color, but it just isn't carefully put together. It honestly looks like something you'd pick up at a flea market for \$5, if that. A nice cookbook - and a cookbook at this price point - should look way more high end. It's probably a WAY better bargain in the Kindle edition.
