Hubert Germain-Robin : Traditional Distillation Art Passion before purchasing it in order to gage whether or not it would be worth my time, and all praised Traditional Distillation Art Passion:

5 of 5 people found the following review helpful. Such a beautiful book.By Gerald JonesWell the book really is beautiful. Lots of context but very little content. I expected a lot more real information and was disappointed. This is a fluffy book. It looks good on the bookshelf where it will remain forever and never looked at again.3 of 4 people found the following review helpful. Traditional Distillation Art Passion - Highly recommended !!By FTThis book is short, sweet, and to the point. It is not a treatise on the subject of distillation. The cover is beautiful, and so is the rest of the

book. This book conveys the authors passion for an art little known in this country. It is an overview of a very broad and varied subject. It is my hope that the author will continue to add subject volumes in the future, adding to a body of knowledge and expertise undocumented in the English language. As one reviewer noted, this is a vocation, and this book wets the appetite for those who wish to pursue this passion. So if you like the book as presented, give the author our thanks and appreciation. I recommend this book. 1 of 1 people found the following review helpful. only OK By Andrew R. a bit short on details and substance---clearly an expert with a passion but was hoping for more practical advice and insights

Traditional Distillation-Art Passion is an introduction to one of the oldest human endeavors - preserving the bounty of the summer. In this book, Hubert Germain-Robin focuses on the essential elements - philosophical as well as technical - for the production of "eau de vie," or water of life. The true art of brandy distillation is to capture, in liquid form, the very essence of the Earth and its summer bounty. All passionate distillers share the same sense of connection between the product and the most basic elements of Earth, Water, Air and Fire, which we work with to capture the essence of the harvest, the eau de vie.
