Nita Mehta : Vegetarian Chinese before purchasing it in order to gage whether or not it would be worth my time, and all praised Vegetarian Chinese:

I was familiar with Indo-Chinese cooking as it is popular among southeast asians. I came across this book and decided to buy it.I truly recommend this book as the recipes are spot-on and so flavorful. I have made several of these recipes and never get tired of it. And there are several color photos of the finished dish so you can see what your results should look like.The price here (as of now) is over \$ 300 on this website but I don't think the book is worth that much. I got mine for \$5 so I would suggest you wait for a price drop.
