This book is black and white without any pictures. All of the recipes attempt to minimize the use of wheat flour and use various other flours, grains, and vegetables to make breads. The book was originally written in 1918 when there was a shortage of wheat flour; now days, more and more bakers are incorporating different kinds of flours into baked goods. I was intrigued by the various methods used to make the

bread--using potatoes, squash, pumpkin, apples, oat flour, corn meal/flour, rye to name only a spare few. The book comprises mostly yeast risen breads, a medium length chapter on quick breads (no-yeast), and a short chapter on cakes. Can't wait to try out a recipe!

Gives you something to think about.

Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.
