Overall far too hard, but as components it is alrightBy daveThis book as other reviewers have said is not for the home cook, for example the 'chocolate slice' recipe calls for approximately 7 different layers of ganaches and mousses! However if you were to say make it with 3 layers it is do-able. Same with other recipes where individual components work well, i.e. the profiteroles for the croquembouche are delicious by themselves without the elaborate caramel and assembly steps.The macarons are nice but you can get the recipes by getting the Zumberons book. It is half the price and deals only with what many people go to his store to get, the

delicious macarons. That book also contains basin macaron recipes which work every time before you begin to branch out into the weird and wonderful. 12 of 15 people found the following review helpful. All ego, and "glossary items" By Andrew Pogonowski This book was written to celebrate an amazing chef, but regrettably not to pass on the passion. Most recipes require very specialist skills and ingredients. The skills take years and the unusual ingredients are never sourced. "See Glossary list Specialist stores" are not very helpful. Sure no compromise is made by this very gifted man in attaining a professional result, but if you write a cook book it is to share the joy of baking. In this respect he fails. All hail the pastry God, but this book will remain unused and the recipes largely unworkable by us mere mortals.

Join Adriano Zumbo on a whirlwind tour through his whimsical world of sweet treats. Learn how to create his Willy Wonka-style inventions, from melt-in-the-mouth macarons with bold flavor combinations to sublime chocolates, perfect pastries and amazing gateaux, and dessert creations. Challenge yourself to conquer the croque-en-bouche, or take on the wonderful, multi-layered v8 cake, both made famous after featuring on "MasterChef Australia". Inspirational and utterly irresistible, Zumbo will take you on a journey beyond the chocolate factory.

"I freaking love this book. It's like Willy Wonka plus Pierre Herme, times rainbow awesome." nbsp; mdash;CakeSpy.com
